

Lennoxville Elementary School

Curriculum Outline-Cycle 3

MATHEMATICS

- The program is designed to promote the development of various concepts such as; problem solving, graphing, number theory, geometry, measurement, fractions and place value. In addition, the math program is sequenced to expose the children to math language and to enable them to learn to make the link between math and the real world.
- The Decimal workbook is used to support the math program.
- Evaluation takes place through teacher observation, self-evaluation and formal testing.
- Through math discussions, students are encouraged to make sense of each other's strategies and to explore the different strategies related to math concepts.
- A large emphasis is also placed on solving situational problems, where the students connect math concepts to the real world.

LANGUAGE ARTS

- The goal of the Language Arts Program is to offer a supportive, literate environment which uses language in varied, functional and meaningful contexts.
- The students are exposed to a wide variety of texts through novels, poetry, short stories, visual and media literacy.
- An emphasis in writing is placed on response to literature and personal narratives.
- The students will also have the opportunity to write a variety of texts such as: opinion based texts, persuasive texts, and informational texts.
- Students will take part in the writing process of drafting, revising, editing, and publishing.
- Independent reading and writing is fostered through the Daily Five approach.
- Evaluation takes place through self-evaluations, peer-evaluations, and teacher evaluations.

- Students will continue to develop their oral communication skills through sharing, small group interactions, and presentations.

FRENCH

- The students will continue to develop their reading, writing, and oral communication in French through various activities. Students will be encouraged to choose “good fit books” to read independently. As a class we will be using works from the “Littéracie en Action” texts.
- As a class, we will read a variety of texts which will prompt discussion and allow the students to practice their oral skills. From these texts, your child will also build their vocabulary.
- Every week, students will engage in “word work” in class and at home. The students are encouraged to study their words at home (mots dictées).
- Throughout the year your child will be assessed on their reading, writing, and oral skills in the form of assignments, formal tests, presentations, teacher evaluations and self-evaluations.

UNIVERS SOCIAL

- Social studies is taught in French (Univers social).
- Students will explore the geography and history of their country and province within a certain timeline. Students will interpret changes that took place over time while becoming more aware of the world around them.

SCIENCE

The science program is taught in English. The students will learn to explore the world of science and technology through projects, experiments and communication. An emphasis will be placed on the scientific method where the students are encouraged to ask scientific questions and then propose explanations or solutions to those problems.

HOMEWORK SCHEDULE

Monday to Thursday:

- Homereading (20 minutes per night)
- Lecture (10 minutes par soir)
- Mots Dictées
- Math (workbook and/or worksheets)

***Students are responsible for writing their homework and due dates in their agenda.**

LES LIBRARY

The students visit the library once per week. They can sign out one english and one french book at a time. All books are due back the following week.
