Hello!

This message is from the L.E.S Earth Day Club. Earth day club is a club that is made of some grade four, five and six students. We have three teachers who supervise our club, Mrs. Gandy, Mme Desbiens and Mrs. Russel. We meet every Wednesday at lunch in the art room. We are working on making our school a better place with less plastic. We are learning what we can recycle, we even went to the recycling plant. We are trying to improve on our recycling at L.E.S.

Here is a picture from our trip to the recycling center.

If you care at all about the environment you should try some of these ways to recycle:

- Reuse your containers from vegetable dip and cream cheese containers.
- Buy a reusable water bottle instead of plastic water bottle that you don't reuse and have to continue buying.
- For Halloween you can *make* a costume instead of buying one.
- Reuse your old Halloween costumes. Or give it to someone new.
- Save your plastic bags and reuse them.
